

IEO SPATIAL DATA **INFRASTRUCTURE**

IDEO

Hands-on Workshop on "The use of the CCLME Eco-GIS Viewer"

11-13 July 2017

Since 1914 the IEO performs multidisciplinary

- Medits surveys. Assessment of bottom fisheries and
- "Radiales surveys". Studies of pelagic system and
- RaProCan surveys in Canary Islands. Studies of

c) Specific studies for special requirements (El Hierro submarine volcanic episode, etc.)

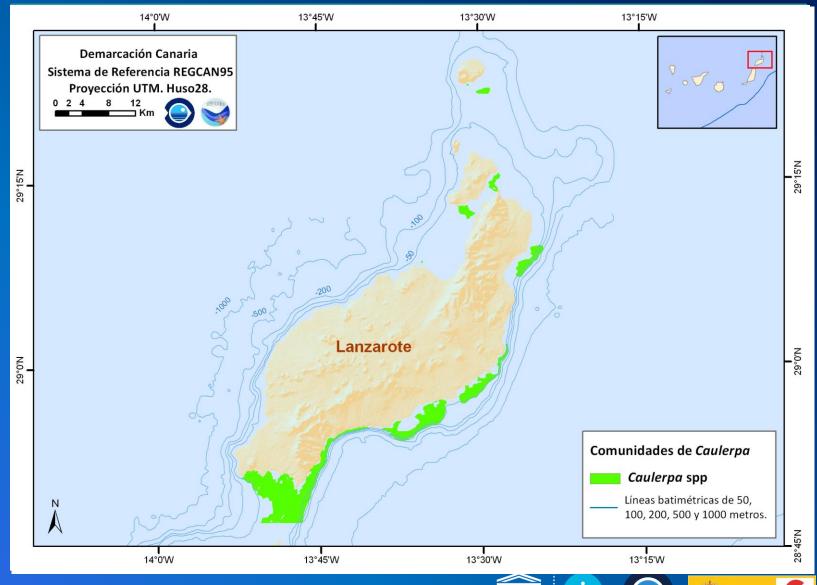

- European Framework Directives:
 - Marine Strategy Framework Directive: requires European States to maintain their marine waters in 'Good Environmental Status'. This involves a continuous evaluation of marine environmental status.
 - Marine Spatial planning.
- Studies to declare Marine Protected Areas (Internares project)
- Taking part in several projects related to fishing resources and ecosystems, working in cooperation with many African countries.
- Others

Marine Strategy Framework Directive

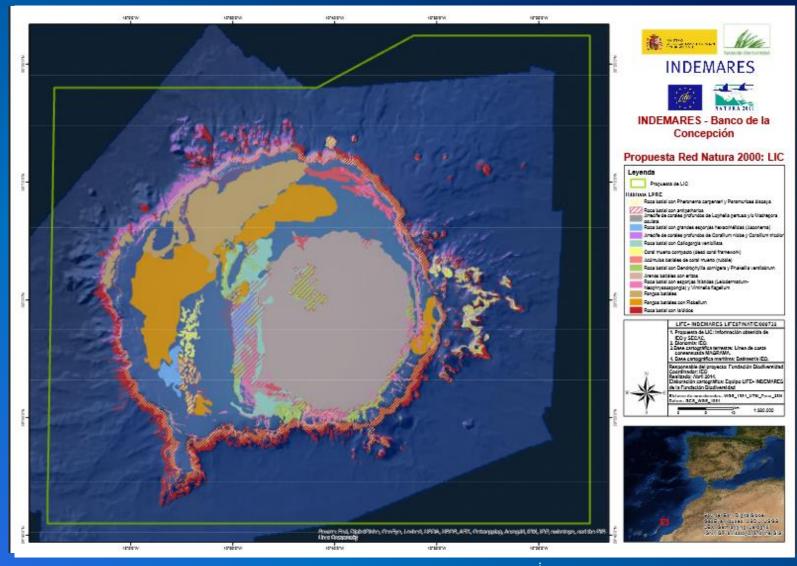

INDEMARES PROJECT

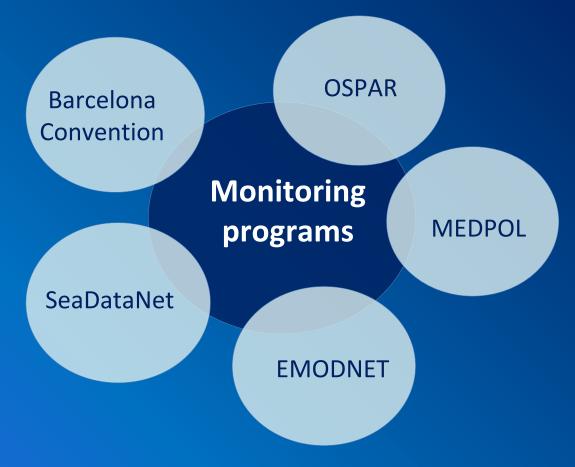

Besides that the IEO is involved in several national and international monitoring and data assembly programs.

Oceanographic data Biological data

Sea buttom data

- This data is organized in different formats:
 - Text files, Excel program, Access database, Oracle database, NetCDF, etc.

Some of this data is stored in different databases

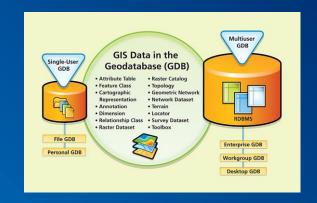

Marine IEO GIS

- IEO GIS aims: organizing, harmonizing, standardizing the IEO data into a consistent database.
- > The data from different IEO databases is integrated into a Geographical Information System (GIS).
- Developing metadata for geographic data: Standards for geographic metadata ISO19115 and INSPIRE.

Cultural Organization • Commission

The different databases provide information to institutional GIS

IEO Spatial Data Infrastructure: IDEO

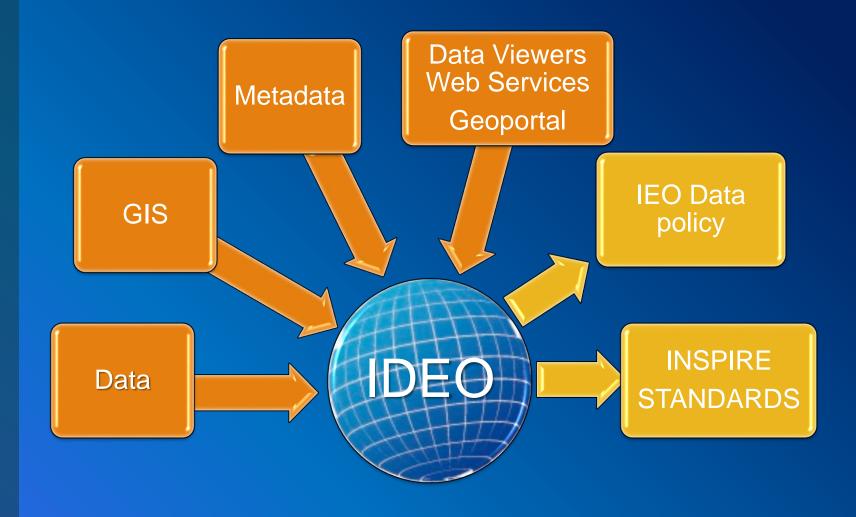

- ➤ In 2009 in order to provide visibility, accessibility, interoperability and to share the information included in the institutional GIS of IEO, we started the development of Spatial Data Infrastructure "IDEO"
- ➤ IDEO is composed of: Web portal, metadata catalog, Web Services and Data Viewers
- >IDEO follows international guidelines and standards OGC, and INSPIRE european standards.

Visor Información Marina Base

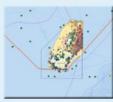

El Visor de información marina muestra información de la naturaleza del fondo, batimetría, límites de reservas, información ambiental, caladeros de pesca, arrecifes artificiales y límites administrativos, (a título informativo y sin validez legal).

Visor de El Hierro

El Visor de El Hierro muestra los primeros resultados de las Campañas Bimbache, realizadas por el IEO entre los meses de Octubre de 2011 y Febrero de 2012, a bordo del B/O Ramón Margalef.

Visor del Parque Nacional del Archipiélago de Cabrera

Visor que muestra diferentes aspectos físicos y biológicos del medio marino de este Espacio Protegido

Dorsal de Walvis / Walvis Ridge

Datos y resultados de tres campañas de investigación multidisciplinares realizadas en 2008 2009 y 2010, a bordo del B/O Vizconde de Eza en las montañas submarinas de Ewing y el banco de Valdivia.

SIRENO

- Since 1999 SIRENO's database incorporates all data about marine species collected from:
 - Oceanographic surveys carried out by researches of IEO
 - Observers on fishing vessels.
- This database contains catch data, biomass, abundance, and data about water column such as temperature, salinity, oxigen, etc.
- Currently, all the information collected by oceanographic surveys carried out by IEO in CCLME zone is stored in SIRENO.
- >It is based on ORACLE.

DATA CENTER of IEO (CEDO)

In 1964 the DATA CENTER of IEO (CEDO) (http://indamar.ieo.es) was created in order to organize the data about physical and chemical oceanography, to standardize this information and to serve the international data network SeaDataNet.

www.seadatanet.org

This database contains temperature, salinity, nutrients and tidal data. The CEDO allows us to consult and download the information.
